ENVIRONMENTAL POLICY AT MTS SENSORS

MTS® SENSORS

Our environmental policy is divided into seven groups, from which the necessary targets and parameters are derived.

S afe

We are responsible for the safety of our employees and the individuals affected by our business. We are committed to achieving our goal of positive environmental performance.

E nergy

We are responsible for continuously decreasing our energy consumption resulting from the production and activities associated with manufacturing of our products. Decisions concerning the environment and the community of MTS are made, if possible, according to energy-relevant aspects.

N atural and other resources

As a manufacturing company, we aim to implement continuous improvements in our processes in order to conserve resources and reduce consumption.

S upervision of legal requirements

We ensure that all applicable legal obligations are considered and met by each employee when introducing, implementing and maintaining the environmental management system (EMS), as far as this is possible.

O rganization of direct & indirect environmental aspects

We are committed to protecting the environment and take into account all aspects of our processes that affect our employees and the environment.

R escue preparation / emergency planning

We are committed to providing our employees with comprehensive rescue and emergency precautions. We regularly test various scenarios for prevention and the associated analyses. The measures deriving from these are regularly reviewed by trained personnel.

S ensitivity for health

We motivate our employees to adopt a healthy attitude towards life and sensitize them for a responsible approach to physical and psychological stress. We provide all necessary and available resources for this purpose.
