ENVIRONMENTAL POLICY AT Temposonics

Our environmental policy is divided into seven groups, from which the necessary targets and parameters are derived.

We are responsible for the safety of our employees and the individuals affected by our business. We are committed to achieving our goal of positive environmental performance.

escue preparation / emergency planning

ensitivity for health

We are responsible for continuously decreasing our energy consumption resulting from the production and activities associated with manufacturing of our products. Decisions concerning the environment and the community of Temposonics are made, if possible, according to energy-relevant aspects.

As a manufacturing company, we aim to implement continuous improvements in our processes in order to conserve resources and reduce consumption.

We ensure that all applicable legal obligations are considered and met by each employee when introducing, implementing and maintaining the environmental management system (EMS), as far as this is possible.

We are committed to protecting the environment and take into account all aspects of our processes that affect our employees and the environment.

We are committed to providing our employees with comprehensive rescue and emergency precautions. We regularly test various scenarios for prevention and the associated analyses. The measures deriving from these are regularly reviewed by trained personnel.

We motivate our employees to adopt a healthy attitude towards life and sensitize them for a responsible approach to physical and psychological stress. We provide all necessary and available resources for this purpose.
